Check Applications Catalog to Verify Cross-Reference.

IMPORTANT NOTICE

All cross-references in this catalog supplement are based on the latest authoritative information available at press time. However, equipment manufacturers often change component suppliers without notice while continuing to use the same filter number. This change could result in a non-critical dimension becoming critical. Other filter manufacturers may use one filter to replace two of ours. Thus, when crossing from a non-original equipment filter number, a problem could develop. If a filter doesn't seal when installed, it should not be used. We cannot be responsible for misapplications. Check Applications Catalog to verify cross-reference.

Original equipment manufacturer's tradenames and trademarks are for identification purposes only. There is no affiliation, sponsorship or connection with the original equipment parts or manufacturer.

BALDWIN FILTERS® 
a CLARCOR company
